Reference Collections of U.S. Patents and Trademarks Available for Public Use in Patent and Trademark Depository Libraries

The following libraries, designated as Patent and Trademark Depository Libraries (PTDLs), receive patent and trademark information in various formats from the U.S. Patent and Trademark Office. Many PTDLs have on file all full-text patents issued since 1790, trademarks published since 1872, and select collections of foreign patents. All PDTLs have both the patent and trademark sections of the *Official Gazette of the U. S. Patent and Trademark Office*. The full-text utility and design patents are distributed numerically on 16 mm microfilm, and plant patents on color microfiche. Patent and trademark search systems on CD-ROM (Compact Disc-Read Only) format are available at all PTDLs to increase utilization of and enhance access to the information found in patents and trademarks. It is through the CD-ROM systems that prelminary patent and trademark searches can be conducted through the numerically arranged collections.

All information is available for use by the public free of charge.

In addition, each PTDL offers reference publications which outline and provide access to the patent and trademark classification systems, as well as other documents and publications which supplement the basic search tools. PTDLs provide technical staff assistance in using all materials. Facilities for making paper copies of patent and trademark information are generally provided for a fee.

Since there are variations in the scope of patent and trademark collections among the PTDLs, and their hours of service to the public vary, anyone contemplating use of these collections at a particular library is urged to contact that library in advance about its collections, services, and hours in order to avert possible inconvenience.

MARKS PUBLISHED FOR OPPOSITION

The following marks are published in compliance with section 12(a) of the Trademark Act of 1946. Applications for the registration of marks in more than one class have been filed as provided in section 30 of said act as amended by Public Law 772, 87th Congress, approved Oct. 9, 1962, 76 Stat. 769. Opposition under section 13 may be filed within thirty days of the date of this publication. See rules 2.101 to 2.105.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

Patent Information in CD-ROM and Diskette Format

The Patent and Trademark Office is currently making available to the public four CD-ROM patent information products: CASSIS/BIB, CASSIS/CLASS, CASSIS/ASIGN, and ASIST.

These patent search tools were originally developed by the Patent and Trademark Office for use in the network of Patent and Tradmark Depository Libraries, and replaced the Classification and Search Support Information System (CASSIS) on-line system used at these libraries. They are now available to anyone on a subscription basis.

CASSIS/BIB features bibliographic information for utility patents issued from 1969 to the present, and for other types of patent documents issued from 1977 to the present. That information includes year of issue, state/country of first listed inventor's residence, assignee at time of issue, status (i.e. withdrawn or expired for failure to pay maintenance fees), current classification, patent title, and patent abstracts (through the most recent three-year period, as disc space allows).

CASSIS/CLASS contains current classification information for all utility, design, plant, reissue and X-numbered patents as well as Defensive Publications and Statutory Invention Registrations issued from 1790 to the present (over 5 million documents). Indexing of classification information has been optimized for rapid retrieval.

CASSIS/ASIGN includes assignments recorded at the Patent and Trademark Office after December 1980 to the present. The entire assignment record for patents may be searched, including assignments recorded before and after a patent issued.

ASIST is a compilation of many patent and classification search tools, previously available only in paper or microfiche format, and includes:

Manual of Classification
Index to the U.S. Patent Classification
Manual of Patent Examining Procedure
IPC-USPC Concordance
Attorneys and Agents Registered to Practice Before the U.S. Patent and Trademark Office

In addition, Classification Definitions, a Patentee-Assignee file, and a Classification Orders Index are included. The Patentee-Assignee file shows assignements at time of issue for utility patents 1969 to present; for other patent types, 1977 to present; and for inventors, 1975 to present. The Classification Orders Index is a list of subclass numbers abolished and established since 1976 with corresponding Classification Order number and effective date.

In addition to the word-searching capabilities inherent in CD-ROM, subscribers receive information updated more frequently than in paper or fiche format.

CD-ROM products in the CASSIS series are updated and mailed approximately six times per year. ASIST is updated and forwarded approximately four times per year.

CASSIS/BIB, CASSIS/CLASS, and CASSIS/ASIGN are currently offered at a subscription price of $210/year each to the U.S., Mexico and Canada, or $252/year each to all other addresses. The current subscription price for ASIST is $161/year to the U.S., Mexico and Canada or $193/year to all other addresses.

Included with a subscription are manuals for installation and use of the retrieval software, which are the only user support available from the Patent and Trademark Office.

In addition to the accessibility of the *Manual of Patent Examining Procedure* on CD-ROM, the *Manual*, updated to include Revision 14, is now available on diskette, allowing users to print, view or search the *Manual* on an AT class IBM compatible PC (or better) with 512K RAM, hard drive and floppy disk drive. **MPEP on Disk** my be ordered on 5.25" or 3.5" diskettes for $50 (U.S. Canada, and Mexico), or $60 (all other addresses). *FolioViews* search software allows the user to navigate through the text by use of hyperlinks, Boolean and proximity searches.

• IMPROVEMENT TO SERVICES

Delays in Services

Days to process filing receipts, letter orders for copies, and assignments have been exceeding goals due to a backlog in the PTO's central mail processing area. The backlog began developing in the fall as a result of a large personnel turnover concurrent with the implementation of fee changes and construction in the area. The backlog began to be reduced in mid-January and is almost eliminated. Although the delay has delayed the timeliness of various services, by the end of February, processing times were showing improvement.

Assignment Cover Sheets

The Office developed PTO Form 1594, Recordation Form Cover Sheet (Trademarks), and PTO Form 1595, Recordation Form Cover Sheet (Patents), to facilitate submitting data required to record an assignment. The first versions of these forms have been available since Sept. 1992, and most assignments are now received with them. Both forms and their instructions will be updated later this year to remove ambiguities and incorporate suggestions received from customers. Until the revisions are completed, the Office will continue to work with practitioners to improve the utility of the current forms.

A practitioner recently noted that the current cover sheets for both patent and trademark assignments are not clear as to the proper entry of different execution dates (Item 3) when there are multiple assignors shown (Item 1). Pending redesign of the forms, the Office suggests when there are multiple assignors named in Item 1, number each assignor, and in Item 3, preface each execution date with the corresponding number. if all assignor information cannot be entered in the space provided for Item 1, enter "See Attached List" and proceed in the same manner. This will enable Assignment Branch staff to associate the correct date with the appropriate assignor.

Another practitioner called to our attention the fact that although the forms indicate "Total number of pages comprising cover sheet" (Item 9), Assignment Branch staff frequently cross out that entry and replace it with the total number of pages submitted, both in cover sheets and the assignment instrument itself. Soon after the forms were printed, Assignment Branch staff found they were better able to verify document integrity by using the total number of pages per submission. This number is then used as a cross-check as the assignment moves through the recordation process, receives reel and frame numbers, is microfilmed, and returned to the customer. Pending revisions to the forms, the preferred procedure is to indicate the total number of pages submitted, both in cover sheets and the attached assignment.

Additional comments or suggestions for improving either or both assignment cover sheets should be directed to Audrey Britt, Chief, Assignment Branch, at (703) 308-9706.

Reference Collections of U.S. Patents and Trademarks Available for Public Use in Patent and Trademark Depository Libraries

The following libraries, designated as Patent and Trademark Depository Libraries (PTDLs), receive patent and trademark information in various formats from the U.S. Patent and Trademark Office. Many PTDLs have on file all full-text patents issued since 1790, trademarks published since 1872, and select collections of foreign patents. All PDTLs have both the patent and trademark sections of the *Official Gazette of the U. S. Patent and Trademark Office.* The full-text utility and design patents are distributed numerically on 16 mm microfilm, and plant patents on color microfiche. Patent and trademark search systems on CD-ROM (Compact Disc-Read Only) format are available at all PTDLs to increase utilization of and enhance access to the information found in patents and trademarks. It is through the CD-ROM systems that prelminary patent and trademark searches can be conducted through the numerically arranged collections.

All information is available for use by the public free of charge.

In addition, each PTDL offers reference publications which outline and provide access to the patent and trademark classification systems, as well as other documents and publications which supplement the basic search tools. PTDLs provide technical staff assistance in using all materials. Facilities for making paper copies of patent and trademark information are generally provided for a fee.

Since there are variations in the scope of patent and trademark collections among the PTDLs, and their hours of service to the public vary, anyone contemplating use of these collections at a particular library is urged to contact that library in advance about its collections, services, and hours in order to avert possible inconvenience.

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
